

Who's involved

Two separate programmes are running for Year 11 and Year 13 students. We have brought together some of the most inspirational and knowledgeable experts from across our schools and from the world of work. Collaboratively we will help to prepare you for life beyond the school gates and give you the advantages you need to stand out from the crowd.

We have partnered with specialist organisations including Debate Mate, LEAD Curriculum and UNleash2020, each a leader in their field, to really engage you in thinking about your ambitions and goals and set you up to achieve them. An immense wealth of experience and guidance is available to you.

Through webinars, presented by a host of experts, including lawyers, primatologists, medical students, doctors and accountants, access to on-line training and qualification opportunities, you can use this precious period of time to constructively improve your skill-set and emotional resilience. You will also receive training and guidance in professional social networking and access MOOCS, Massive Online Open Courses, (Yr 13) and virtual Sixth Form taster lessons (Yr 11).

CHOOSE TWO FROM THESE OPTIONAL ELEMENTS

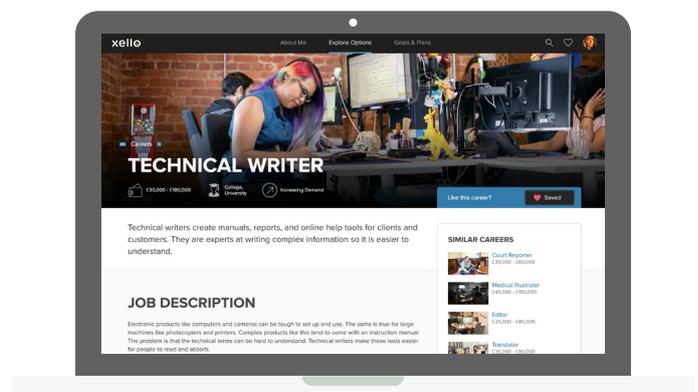

Support when and where you need it

Your tutor will be your mentor and guide you through the programme. S/he will provide bespoke assignments, suggest great materials to look at, encourage you to watch webinars from experts in the fields you have shown interest in. S/he will introduce on-line learning opportunities, linked to your chosen career, and support you throughout.

You will check in with your tutor regularly to present back ideas, discuss assignments and to receive the support and encouragement you need to excel.

We have invested in a platform called Xello which will drive all elements of the Inspiring Futures programme and will be your information hub throughout. Xello is an engaging on-line program that prepares students for success in academics, careers and life.

We have significantly enhanced and developed this already superb programme. In addition to the in-built careers and higher education functionality, you will have a bespoke dashboard with specific resources for you. You will be able to post all your assignments into the programme and communicate with your tutor.
